

What Else?
A programme
designed for you to
advance your career
with the right tool-set
AND mind-set.

As a highly experienced and trained employer, manager, coach and mentor, Rae has the knowledge and skills to help you to not only be successful in your chosen career but to advance up the career ladder as well.

Advance your career with the right tool-set AND mind-set.

Imagine yourself in your dream job - what does it look like? Are you enjoying it? Why?

Now turn around and look back at the journey you took to achieve your dream job. How did you get there? What steps did you take? What training, development and experience did you undertake to get to where you are now (in your imagination)?

Now make it a reality!

Don't just float along, hoping the right job will come up. Rae will help you to take control and really interrogate where you would like your career to go.

- What do you love doing at work? At home? In your personal life?
- What are you paid to do?
- Is there overlap between the two? If not, why not?
- Do you need training and development to achieve the overlap?

This course consists of either 3 hour-long sessions over 3 months or six hour-long sessions over 6 months. It will be tailored to suit you and your needs.
